Professional Summary

Software Developer with 2+ years of experience building full-stack products and backend services using TypeScript, JavaScript, Node.js, Express.js, NestJS, React, Next.js, Tailwind CSS, MongoDB and PostgreSQL. Experienced in REST APIs, workflow automation, background processing, third-party integrations and responsive frontend development. Has contributed to marketing technology, restaurant ordering, HR management, AI onboarding, website builder and e-commerce products.

WORK EXPERIENCE

Software Developer – Mentor Friends Apr 2026 – Present

DataBN, All-in-One Marketing Platform

Developed TypeScript and Node.js REST APIs for a centralized marketing platform covering campaigns, contact management, audience segmentation, workflow automation, billing, notifications and analytics.

Key Responsibilities

- Built automation workflows with configurable triggers, actions, conditions, delays, email steps and reusable templates
- Integrated email, SMS, Messenger, Instagram and WhatsApp communication into one platform
- Implemented asynchronous task processing and scheduled jobs with BullMQ and Redis for campaign delivery
- Built Stripe billing and subscription workflows: public plans, checkout, subscription status and billing portal
- Built audience segmentation with dynamic rules, contact filtering, audience previews and pagination
- Integrated TinyMCE into the workflow email editor for formatted email content within automation steps
- Implemented API validation, JWT authentication, rate limiting, security middleware and structured logging
- Improved public website SEO with semantic HTML, metadata, canonical URLs and structured data
- Wrote unit and integration tests with Vitest and Supertest for APIs, automation actions, authentication and webhooks

Web Developer – Conscious Technology Feb 2024 – Jul 2025

- Developed and maintained full-stack web features using the MERN stack, delivering user interfaces and data processing pipelines
- Maintained and updated existing websites, fixing issues and implementing changes as required
- Automated backend validation and API stress testing with Postman and JMeter to check stability under peak traffic
- Managed defect tracking and sprint workflows in JIRA across engineering, design and product teams

EDUCATION

Presidential Graduate School, *B.Sc. Information Technology* Feb 2021 – Jul 2025

- **GPA: 3.56**
- **Relevant Coursework**: Database, Artificial Intelligence, Application Development, Software Design and Development, Operating Systems, Java, C#, AWS

LEADERSHIP EXPERIENCE

Student Academic Representative – Presidential Graduate School Nov 2022 – Oct 2024

- Acted as the liaison between students and faculty and resolved academic concerns
- Organized workshops, tech events and academic initiatives for peer engagement and skill building

PROJECTS

DataBN, All-in-One Marketing Platform – Developed backend services for contacts, dynamic and static segments, email campaigns, automation workflows, billing, notifications and campaign analytics. Built multi-channel workflows across email, Messenger, Instagram, WhatsApp and SMS, with campaign scheduling on BullMQ and Redis. Integrated Stripe checkout, subscription management and the customer billing portal. Built frontend flows for workflow creation, template selection, email editing, segment management and campaign analytics.

Kebab Bros, Smart QR Restaurant Ordering and Billing – Built an end-to-end ordering system with unique QR codes per table and waiter, digital menu ordering, live order status, kitchen dispatch and automated billing.

Wedding Insite, AI-Powered Couple Onboarding – Built onboarding APIs with conversational AI intake, personalized timelines and budgeting tools, guiding couples through vendor coordination and task tracking.

Humanizing Data, HR Platform – Built HR modules for employee records, attendance and equipment inventory with role-based access control.

Website Template Builder – Designed layout engines and backend endpoints for customizable drag-and-drop website templates.

E-commerce Platform – Product browsing, shopping cart workflows and secure API integrations.
